A SYSTEMS APPROACH TO UNDERSTAND AND ENGINEER WHOLE-CELL REDOX BIOCATALYSTS

Shaker Verlag Feb 2012, 2012. Buch. Condition: Neu. Neuware - Redox-cofactor dependent biotransformations are preferably done in whole microbial cells to exploit the active metabolism for redox-cofactor regeneration. The general assumption that these redox-reactions operate independently of the host metabolism was questioned in this thesis. The potential mutual impact of the redox-cofactor consuming biotransformation and the redoxcofactor regenerating metabolism was investigated by systems biology approaches coupling computational modeling with experimental techniques. Metabolic modeling depicted a dependency of NADH-availability on metabolic...

Reviews

Comprehensive manual for ebook fans. It is one of the most amazing book i have go through. Your life span will probably be change the instant you full reading this article ebook.

-- **David Kovacek**

Completely one of the better pdf I actually have possibly go through. It usually is not going to price too much. Your life period will be enhance the instant you total looking at this ebook.
