Genome Organization and Expression in Plants

By Leaver, C.

Book Condition: New. Publisher/Verlag: Springer, Berlin | In the summer of 1976 a successful workshop on nucleic acids and protein synthesis in plant systems was organised in Strasbourg by Jacques Weil and Lawrence Bogorad. The participants in the workshop, were, without exception, excited both by the quality of the work discussed and by the rapid progress being made in several areas of genomic analysis and expression in plants. It also became apparent that there was a need for an international assembly of this sort at regular intervals. These workshops not only encourage stimulating discussion and constructive thinking but also result in increased collaboration and productive liaison between laboratories with common interests. Hence a ten-day advanced studies institute course was organised in Edinburgh from 11-21 July 1979, and in this volume we have published the contributions given by the invited speakers. The subjects discussed covered most areas of plant molecular biology and the lecturers were asked to balance a review of their chosen subject with the results of their own recent research and likely future advances. Probably the most important technical advance since the previous meeting of this group in Strasbourg, was the application of restriction enzyme analysis and cloning...

Reviews

This pdf may be worth purchasing. This is for anyone who statte there was not a really worth reading. I found out this pdf from my i and dad encouraged this pdf to understand.

-- **Mrs. Annamae Raynor**

If you need to adding benefit, a must buy book. This really is for all who statte that there had not been a well worth reading. It is extremely difficult to leave it before concluding, once you begin to read the book.
