BRAND NEW, Dry Run: Preventing the Next Urban Water Crisis, Jerry Yudelson, In the Age of Scarcity now upon us, fresh water shortages are an increasingly serious global problem. With water restrictions emerging in many developed countries and water diversions for industrial, urban, and environmental reasons stirring up oceans of controversy, there is a growing thirst for innovative approaches to reducing our water footprint. Featuring original interviews with more than twenty-five water researchers and industry experts, this book explains water issues and proposes solutions for homes, buildings, facilities, and schools. Examining the vital linkages between water, energy use, urban development, and climate change, Dry Run demonstrates best practices for achieving "net zero" water use in the built environment, including: - Water conservation strategies for buildings, factories, cities, and Rainwater harvesting - Graywater reuse and water reclamation systems - Water efficiency retrofits - On-site sewage treatment - New water reuse and supply technologies Ideal for concerned citizens, building managers, homeowners, architects, engineers, developers, and public officials faced with charting a course in a more arid future, Dry Run overflows with practical solutions.
