An Air Force Command and Control Battle Lab: Key to Information and Battlefield Superiority (Paperback)

By Shannon M Sullivan

Biblioscholar, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. To ensure information superiority for warfighters in the 21st century, the Air Force needs to develop and implement a command and control battle lab. This facility must rapidly integrate new command, control, communications, computers, intelligence, surveillance, and reconnaissance (C4ISR) technologies, doctrine, and concepts of operations into the joint warfighting arsenal. Air Force leadership has taken a critical first step by defining information superiority as a core competency. The next phase is to determine a strategy for its execution. Our current acquisition system is woefully lacking in its ability to obtain technology. Equally lacking is the warfighter's ability to modify doctrine and organizations to best exploit the technology. A promising solution is the battlefield laboratory, or battle lab. The philosophy of a battle lab is to create a place where warfighters, developers, and industry come together to evaluate, integrate, and apply technology.

Reviews

I actually started looking over this publication. It really is rally interesting throgh studying period. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Dana Hintz**

Good electronic book and valuable one. It really is basic but unexpected situations in the 50 percent in the pdf. You wont really feel monotony at at any moment of your time (that's what catalogues are for concerning when you ask me).
